SELF BEACON

THE 30-DAY BURNOUT RESET

ARCHETYPE

The Exhausted Body

The body gave out first. It has been trying to tell you something.

A prescription, not a journal. Open it. Follow it. 30 days built specifically for your burnout pattern.

selfbeacon.com

YOUR PROFILE

YOUR PATTERN

Burnout that lives in the body before it registers as a mental state. Persistent fatigue, tension that does not release, sleep that does not restore, physical symptoms that doctors cannot fully explain. Keeps pushing through because the alternative feels like failure.

Your emotional signature

Tired in a way that sleep does not fix. Jaw clenched. Shoulders up near ears. Stomach tight before difficult conversations. Has learned to function at a high level while running on empty — and now the body is refusing to cooperate.

TRIGGER

Being asked to do more when already at capacity · Poor sleep compounding into a deficit · Skipping rest to meet demands · The physical signals being ignored long enough to amplify

RESPONSE

Push through with caffeine or willpower · Ignore the physical signals · Promise rest later that never comes · Minimise symptoms to avoid appearing weak

ACTION

Skip meals or eat unconsciously · Exercise harder as a way to feel control · Collapse into passive consumption instead of genuine rest · Cancel healthcare appointments that feel non-urgent

COST

Physical symptoms that compound: tension, headaches, digestive issues · Sleep quality degrading despite exhaustion · Immune system weakening — getting sick more often · The body increasingly refusing to perform at the level being demanded of it

Your 4-week arc

Week 1 — Acknowledge	Listen to the body without trying to override it
Week 2 — Rest	Structured rest practices and sleep anchoring
Week 3 — Regulate	Nervous system regulation through breath and body work
Week 4 — Restore	Building a sustainable physical foundation

EMERGENCY REFERENCE — PHOTOGRAPH OR CUT OUT THIS PAGE

WHEN YOU SPIRAL

3-step protocol for each acute moment. Use it — do not think about it.

OVERWHELM

Heart racing. Too much at once. Cannot prioritise.

1. **Ground your body**
   Both feet flat on the floor. Full exhale — longer out than in. Say: I am here, I am safe right now.
2. **Name one thing only**
   Not the list. One thing. The single most pressing item. Write it. Everything else is later.
3. **Two minutes then decide**
   Work only on that one thing for two minutes. After two minutes: stop or continue.

SHUTDOWN

Numb, detached, going through the motions.

1. **Name it out loud**
   Say or write: I am in shutdown. My system is protecting me. It is temporary. I am not broken.
2. **One physical action**
   Cold water on wrists. Stand and stretch arms wide. Walk to a window. Body re-engages through movement.
3. **5-4-3-2-1 grounding**
   5 things you see. 4 you can touch. 3 you hear. 2 you smell. 1 you taste. Returns attention to the present.

ANXIETY SPIKE

Sudden panic. Chest tight. Catastrophic thoughts starting.

1. **4-7-8 breath**
   In through nose for 4. Hold for 7. Out through mouth for 8. Three cycles. Activates parasympathetic response.
2. **Question the catastrophe**
   Ask: is this happening right now, or am I predicting? Anxiety lives in the future. You live here.
3. **Reduce the scope**
   What is one thing you can do or decide in the next 10 minutes? Do only that.

WEEK 1

ACKNOWLEDGE

Listen to the body without trying to override it.

DAILY SCHEDULE

TIME	PRACTICE	WHAT TO DO
6:30 AM	**4-7-8 breath**	3 rounds. This is the non-negotiable morning anchor. Before anything else.
6:35 AM	**Body check**	Head to feet. Where is tension? Jaw, shoulders, stomach, hips. Just name it. Do not fix it yet.
6:38 AM	**Energy honest**	Rate physical energy 1-10. Not willpower. Actual body energy. Plan the day from this number, not from what is expected.
12:00 PM	**Rest micro-break**	5 minutes. Eyes closed or soft focus. No phone. The midday reset is not optional.
12:05 PM	**Hunger check**	Are you actually hungry? Have you eaten? The body sends clear signals that often get overridden.
9:00 PM	**Screens off**	20 minutes before sleep. Replace with stretching, reading, or stillness. Non-negotiable.
9:05 PM	**Full body scan**	Systematic head to feet. Note what has changed since morning. The trend over 30 days matters.
9:10 PM	**Rest without guilt**	Say or write: rest is required, not earned. My body is working even when I am still.

WEEK 1 FOCUS

Listen to the body without trying to override it. The body is not failing you. It has been absorbing what you would not acknowledge. Every 20 minutes of genuine rest is a direct investment in the system that makes everything else possible.

END OF WEEK 4

What showed up most this week?

Which practice felt most useful?

What do I carry into next week?

TECHNIQUE LIBRARY

HOW THE TOOLS WORK

Six techniques matched to The Exhausted Body. Exact steps.

---

01 — 4-7-8 BREATHING

In for 4, hold for 7, out for 8. Activates parasympathetic response within 90 seconds. The body does not know you are not in danger — this tells it you are safe.

02 — BODY SCAN

Head to feet, daily. The practice is not relaxation — it is learning to notice what the body is holding before it becomes an injury or illness.

03 — REST WITHOUT GUILT

20 minutes daily. Not sleep. Not scrolling. Rest. The body recovers during rest, not during productivity. This is not laziness — it is maintenance.

04 — SLEEP ANCHORING

One fixed wake time, seven days a week. More powerful than any sleep supplement. Consistency is the anchor that repairs the circadian rhythm.

05 — GENTLE MOVEMENT

10 minutes of walking or stretching daily. Not exercise as punishment. Movement as communication with the body. What does it need today?

06 — 5-SENSES GROUNDING

5 things you can see, 4 touch, 3 hear, 2 smell, 1 taste. Pulls attention from future anxiety into present physical reality. The body is always in the present.

YOUR PATTERN CARD — READ AT THE START OF EACH WEEK

THE LOOP
& THE INTERRUPT

TRIGGER

Being asked to do more when already at capacity · Poor sleep compounding into a deficit · Skipping rest to meet demands · The physical signals being ignored long enough to amplify

Interrupt: These activate something real. That does not make them emergencies. Notice the activation without acting on it.

RESPONSE

Push through with caffeine or willpower · Ignore the physical signals · Promise rest later that never comes · Minimise symptoms to avoid appearing weak

Interrupt: Protective responses, not character flaws. Slow them by 3 seconds. That is all that is needed.

ACTION

Skip meals or eat unconsciously · Exercise harder as a way to feel control · Collapse into passive consumption instead of genuine rest · Cancel healthcare appointments that feel non-urgent

Interrupt: Looking for relief. Ask: does this give relief, or silence while the real thing grows? Rest without disappearing.

COST

Physical symptoms that compound: tension, headaches, digestive issues · Sleep quality degrading despite exhaustion · Immune system weakening — getting sick more often · The body increasingly refusing to perform at the level being demanded of it

Interrupt: Each 3-second pause at step 2 reduces the cost at step 4. Small interruptions, compounded over a month, produce real change.

YOU ARE NOT BROKEN.

YOU CAUGHT IT.

THAT TOOK HONESTY.

Use this on the hard days. Especially the hard days.
